What is a Minecraft Server Offline Mode? – The offline mode for a Minecraft Server means that all of the plugins are turned off and you can just play the game as if it were only you on the server. This is nice for those who just want to play Minecraft on their servers without having to worry about anyone else's creations. It does not mean that you are left in your own world, but rather that your server will be private and no one else can connect unless they know your IP address. If someone were able to connect, then they would simply see a world that is completely empty with no buildings or trees. The only way that anyone would be able to connect to your private server would be from a direct connection through the same IP address that you provide in your network settings. If you do not want to use this method, then simply make sure that nothing can be edited by anyone except for yourself.",
